BWELDMONT s.r.o.

Your Certified Partner for Pipeline Construction, Welding Technology, and E&I Infrastructure

Year of Est.:	2015	**Core Markets:**	Germany, Germany, Netherlands, Belgium, Austria
Cooperation:	Contracts (Werkvertrag) or Hourly Rate basis	**Expertise:**	Stainless Steel (RVS), TIG, Orbital, Isometry, E&I

ABOUT US

Since **2015**, BWELDMONT s.r.o. has operated as an experienced and highly qualified B2B subcontractor in the Western European market. We specialize in industrial stainless steel piping, certified welding technologies, isometry, and industrial electrical installations (E&I). Our main goal is to flexibly, legally, and at the highest quality level support general contractors during capacity shortages or strict project deadlines.

CORE INDUSTRIES & REFERENCES

We possess a strong portfolio of successfully executed projects in the German and Western European markets within sectors demanding the highest quality, hygiene, and safety rules:

- **Food & Beverage Industry:** Process piping systems for production lines, dairies, and breweries matching the highest hygiene regulations.
- **Pharmaceutical Industry (Pharma):** High-purity piping and cleanroom technology executed under strict orbital welding standards.
- **Petrochemicals & District Heating:** Assembly and welding of process piping systems and large-scale district heating networks (**Fernwarme**) under strict X-ray testing.

OUR CORE COMPETENCES

We provide complete, experienced, independent, and fully equipped teams for the following fields:

- **TIG & Orbital Welding:** Welding of stainless steel (RVS), carbon steel, and special alloys with a strict focus on premium **X-ray quality**.
- **Isometry & Pipefitting:** High-precision prefabrication and assembly of piping systems, valve nodes, and process modules directly according to isometric drawings (ISO).
- **Industrial Electrical Engineering (E&I;):** Installation of cable trays, industrial wiring, professional grid connections, and E&I solutions for industrial facilities.

LEGALITY & WORKPLACE SAFETY

- **Welder Certifications:** All welders are certified and tested according to **DIN EN ISO 9606-1** (TUV SUD approved).
- **Workplace Safety:** All employees hold the internationally recognized safety certifications **VCA / SCC Petrochemie**.
- **Legality & A1 Forms:** Seamless provision of all A1 certificates for fully legal, compliant deployment of workers within the EU.
